KERALA STATE E-WASTE LANDSCAPE & CIRCULARITY

Regional Material Flow, Formal Capacity Deficits & Circular Roadmaps

13-Slide Comprehensive Analytical Presentation · Course: VEC02 EWEM · AY 2026–27

SLIDE 02 // MACRO METRICS

State E-Waste Balance Sheet (Annual Baseline)

Macro Parameter	Measured Value	National Benchmark	Variance Analysis
Annual E-Waste Generation	38,395.84 MT	68,000 MT (State Avg)	Lower per-capita hardware waste
Material Recovery Efficiency	75.83%	54.2% (National Avg)	+21.6% superior informal dismantling
State Collection Rate	62.60%	41.8% (CPCB Report)	High literacy & municipal awareness
Authorized Formal Capacity	8,600.00 MT	35,000 MT Target	Critical 77.6% Capacity Gap Deficit

Key Finding: While Kerala achieves an exemplary 75.83% material recovery efficiency, over 77.6% of generated volume flows through unauthorized scrap aggregators due to a severe formal capacity deficit.
